

Technical Features

Equipped with a super fast sewing head (6000rpm) specifically made in Japan by Yamato Japan and with the original Vi.Be.Mac. puller system, which results in an incredible improvement in the quality of the finished garment with the 2 quarters of material perfectly coupled, no twisted effect on the legs!

The puller system avoids the need of a skilled operator, who should be (in case of standard unit) pulling the quarter pieces of trousers in order to match perfectly the two parts.

The ergonomic stand which is adjustable in height and bends on itself to allow easy maintenance and cleaning operations.

Technical Specifications

Max Sewing Speed: 6000 rpm

Stitching Length: from 2 to 5 mm

Spi Pince: 5-13

Sewing Machine Motor: XCG 554 20Y

Power Requirement: 220 V Single-Phase 50/60 Hz

Control Box: XCG MFY 2005

*Gross Weight: 125 kg
Fumigated Recycled
Packing Dimension*
